Dear Sir

RE: DESIGN REVIEW AND CERTIFICATION OF ALUMINIUM BLEACHER

We certify that:

- ▶ We are practising structural engineers and are corporate members of the Institution of Engineers Australia with NPER registration.
- ▶ We have carried out a structural design review of the three tier and the four tier bleachers for both the four meter and six meter long configuration. A description of the bleachers and the results of the design review are detailed in our report number 09047-A dated 13th November 2009.
- ▶ The three tier and four tier aluminium bleachers in both the 4 meter and 6 meter configurations, when built in a workmanlike manner and regularly maintained, will be structurally adequate to support the design superimposed loads as specified in the Loading Code AS 1170.1 – 2002.

Yours faithfully
DINCEL & ASSOCIATES
