WELCOME TO BAB ALUMINIUM

For 40 years, BAB Aluminium has specialised in the manufacture and supply of aluminium seating solutions purpose-designed for Australian schools.

Australian-made and proven across education environments nationwide, BAB Aluminium seating is a trusted fixture in school playgrounds, learning precincts, assembly areas and sporting facilities. Our products are engineered specifically for school use, delivering long service life, low maintenance requirements and consistent performance over decades of daily use.

BAB Aluminium understand procurement objectives by providing seating, table settings and grandstands that align with long-term asset planning, budget certainty and duty-of-care obligations. With 45 years' experience supplying Infant, Primary, Secondary, TAFE and tertiary education facilities, BAB Aluminium offers standardised, compliant and durable seating to minimise lifecycle costs and ongoing maintenance.

Australian manufacture ensures reliable supply, consistent quality control and accountability, enabling confident, low-risk procurement decisions supported by proven performance across school installations nationwide.

WHY BUY FROM BAB ALUMINIUM

We are the manufacturer of the original 'ALCAN' (now CAPRAL) seating system that commenced in the 1980's.

We have extensive manufacturing experience across our 40 years of manufacturing aluminium products for our clients. You can be comfortable in the knowledge that BAB will supply a superior product for your requirements.

Our customer base is across all states and territories of Australia and stretches the globe including clients in London, Singapore, Thailand, Papua New Guinea and New Zealand.

BAB ALUMINIUM LEADS THE WAY IN AUSTRALIAN-MADE, LOW CARBON ALUMINIUM SEATING

In today's rapidly changing world, sustainability has become a critical consideration for businesses across industries.

As consumers become more **environmentally conscious**, companies are under increasing pressure to adopt sustainable practices and **reduce their carbon footprint**. **BAB Aluminium**, a leader in the aluminium seating industry, has taken a significant step towards prioritising the environment by switching to **LocAl® Super Green Low Carbon Aluminium supplied by Capral Aluminium**. This shift in aluminium procurement strategy reduces their environmental impact and demonstrates their commitment to finding more sustainable product alternatives.

Established by **Brian Blowes**, BAB Aluminium manufactures and supplies high-quality aluminium seating and setting solutions for various industries, from schools to large-scale sporting stadiums. In fact, regardless of where you are in Australia, there is a good chance you've sat on an aluminium seat manufactured by BAB. Growing in scale, quality and diversity of range over the past **40 years**, the BAB name has become synonymous not only with durable, high-quality seating but with innovation and their ability to engage with the client.

BRIAN BLOWES, CEO

“ARCHITECTS AND DESIGNERS OFTEN SPECIFY OUR ALUMINIUM SEATING AND GRANDSTANDS. WE WORK IN CONSULTATION WITH ARCHITECTS TO ENSURE THE INDIVIDUAL NEEDS OF THEIR PROJECT ARE MET, AND WE CONSTANTLY WORK TO EXCEED OUR CLIENTS’ EXPECTATIONS.”

“BOTH BAB AND GRANDSTANDS AUSTRALIA, OUR GRANDSTANDS DIVISION, SUPPLY SEATING ALL OVER AUSTRALIA; YOU WILL FIND BAB ALUMINIUM PRODUCTS IN THE HEART OF SYDNEY’S CBD AS WELL AS REMOTE COMMUNITIES WITHIN “THE KIMBERLEY”

Capral's LocAl® Super Green primary aluminium offer is amongst the lowest carbon aluminium available globally at 4kg CO2e/kg Al*. This product will be used to extrude BAB Aluminium seating from now on. Produced using hydroelectricity, LocAl® Super Green achieves significantly

lower CO2e emissions per kilo of Aluminum produced compared to traditional energy sources. Responsible product procurement and stewardship have always been a priority for BAB Aluminium, an active member of SEDEX, a global organisation focused on supply chain sustainability

practices. In addition to the apparent benefits of sourcing Low carbon aluminium, Brian and his team are encouraged by the recent Certification of Capral under the Aluminium Stewardship Initiative (ASI) Performance and Chain of Custody Standards.
